Bruce,

I will contact the surveyors and get back to you. I believe they can do this without any field work.

Jessie

Jessie,

I appreciate you sending these maps. We actually need the exact coordinates and exact footage calls – thanks.

Subject: Section 36 Lat/Long

Bruce,

I have attached two documents, the first is a survey plat showing section 36 in T5S-R4W is slightly irregular, it is not a perfect mile by mile square. I added the footage that the East Quarter section should be at to the plat in red text—this was done by me NOT the surveyors.

The second document, a map I have been working on, shows the approximate Lat/Long values of the corners. The coordinates are in NAD27, Zone 12, survey feet.

If you want more precise values, we will need to contact our surveyor to get those, please let me know what you need. I can update the map and remove the “DRAFT” status on it once we know about how precise you want the coordinates.

Jessie Graham
